

Lens distortion calibration targets -- 35mm and 120/6x9 strips

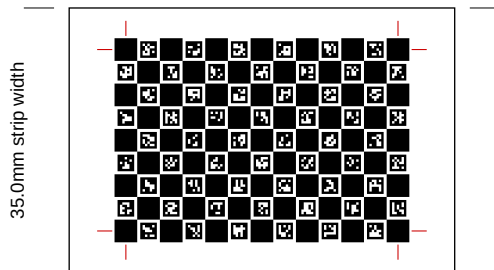

Print at 100% / Actual Size. Do not scale to fit the page.

35mm strip

ArUco DICT_5X5_100, ids 0-57 (58 markers), marker size 2.2mm, chessboard corners 12x8

strip: 35.0mm (W) x 51.0mm (L) | grid: 27x39mm (9x13 squares @ 3.0mm)

(red ticks = nominal frame boundary, 36×24mm)

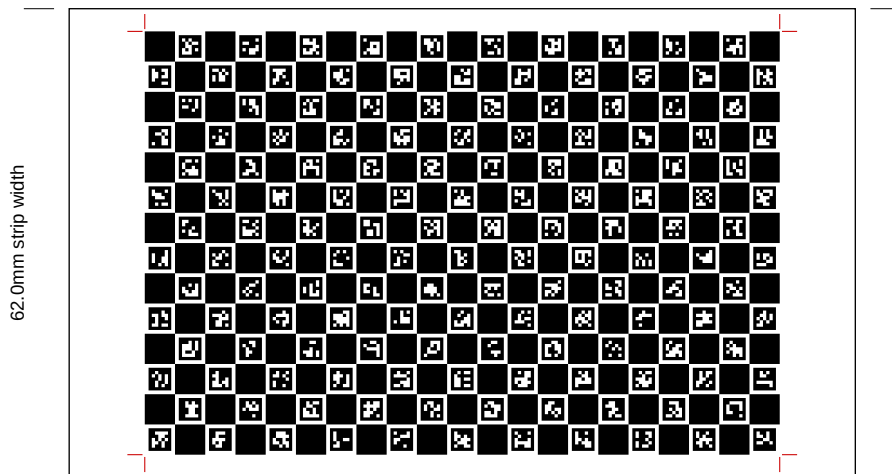

Recreate in OpenCV: `cv2.aruco.CharucoBoard((13, 9), 3.0, 2.2, cv2.aruco.getPredefinedDictionary(cv2.aruco.DICT_5X5_100))`

120 / 6x9 strip

ArUco DICT_5X5_250, ids 0-146 (147 markers), marker size 3.0mm, chessboard corners 20x13

strip: 62.0mm (W) x 104.0mm (L) | grid: 56x84mm (14x21 squares @ 4.0mm)

(red ticks = nominal frame boundary, 84×56mm)

Recreate in OpenCV: `cv2.aruco.CharucoBoard((21, 14), 4.0, 3.0, cv2.aruco.getPredefinedDictionary(cv2.aruco.DICT_5X5_250))`

PRINT SCALE CHECK: this line must measure exactly 50.0 mm with a ruler.

0mm

50mm

If it doesn't, your print/export scaled the page -- reprint at 100% / Actual Size, "Fit to page" OFF.
